

Notes

1. Map

Map dimensions are liquid

2. Geolocation

The home page only starts here if the browser doesn't support geolocation, or if geolocation is not in Philadelphia.

Otherwise, the initial screen looks like

[20_ZoomedPhillyMockup](#). The zoom search box supports auto-completion. Enter either zooms or displays a message right below the search box, **<address> not found in Philadelphia**

3. Report link

Clicking the "Report a vacant property" link opens a form. See [30_ReportFormMockup](#).

4. Map grid

Shade grid squares by density. Single click to see summary. Double click to zoom into that grid square.

- [Report a vacant property](#)

1. **234 Xyzzy Street**
Owned by the city
Full of weeds and trash
Reported March 2, 2012 [edit](#)

2. **567 Foobar Avenue**
Privately owned
Boarded up, graffiti
3 people have called [311](#)
Reported February 21, 2012 [edit](#)

1. Property Overlay

When zoomed in enough for 16' to be at least 1/8" on the map, show properties as parcel geometry instead of grid squares. Zooming by entry in the search box zooms to this level.

2. Report

Clicking the "Report a vacant property" link opens a form, and shows a tip for choosing a location by clicking on the map. See [30 ReportFormMockup](#).

3. Edit

Clicking an "edit" link in a property description on the left produces the [50 EditFormMockup](#) form.

4. List of Properties

The list of properties on the left corresponds to properties that are showing on the map.

Notes

- 1. Form Placement
It may be necessary to pan the map to make room for the form. The balloon point might be positioned on the side of the balloon.
- 2. Form Height
If there is more than one row of images, a vertical scrollbar appears, just for the images.
